

System telephone for PABX systems in the tiptel 30xx family tiptel 85 system

The tiptel 85 system telephone is an ideal team player that supplements the tiptel 3011/22 system and tiptel 3011/22 office telephone systems with numerous system functions and makes them easy to operate. Thanks to its illuminated graphic display and easy menu navigation, settings can be made quickly and intuitively. Central functions of the telephone system, such as the central phonebook that can hold up to 5,000 entries or the integrated voicemail system, can be used comfortably and efficiently.

Designed especially for office use, the tiptel 85 system offers special features for professional users. A large local phonebook as well as detailed lists of incoming and outgoing calls save valuable work time. The tiptel 85 system also has a connection for headsets to assist employees at workplaces with high call volumes.

- Large, illuminated graphic display
- Comfortable, intuitive menu navigation
- Menu-supported operation of telephone system voicemail function**
- Comfortable access to central phonebook of the telephone system with up to 5,000 entries*
- Local phonebook for 1,000 names with up to 3 numbers each (office, private, cell)
- Administration of several user profiles to quickly switch over the status of the device
- 10 programmable function keys, can be extended by up to three DDS modules tiptel KM-30
- Connection for headset
