

# musiphone<sup>®</sup> CR-100 USB

Features:

single-desk call-recording

no soundcard necessary

*the acoustical  
notepad of  
your telephone*

## Range of application

**musiphone<sup>®</sup> CR-100 USB** is a single-desk call-recording unit. It provides the opportunity to record and file any telephone calls, room conversations or speech notes.

The small device is connected between desktop telephone and handset or directly to the analogue line of the telephone. The Windows software is installed on the local desktop or laptop. Only requirement is a free USB port.

The storage of the recordings can be done in a wav-format or in a coded format with password-protection. Those files are protected if they are sent via eMail. Additionally, the files can be tagged with a comment concerning names of the company and person or any other notes.

The most convenient and clear storage functionality of the software offers many ways to look up and open files: Date, time, name or company. The recording can be played either with the integrated speaker of the CR-100 USB or with the desktop PC.
