

To help you manage the calls you record, Call Mynah allows you to add information to calls:

Making Calls Important - The Important! feature allows you to easily search and find calls. You can make a call Important! During a call or when you are reviewing calls later. Listing calls by Important! Makes finding and playing them much easier.

Making Calls Important- The Important! feature allows you to easily search and find calls. You can make a call Important! during a call or when you are reviewing calls later. Listing calls by Important! Makes finding and playing them much easier.

Adding Comments To Calls - Call Mynah has 10 pre-defined comments that can be added to a call. You can edit the comments to select your own preferences on Call Mynah or on your PC. Examples of standard pre-defined comments are 'Order Placed', 'Agreement Made' 'Follow Up' .

You can also add custom comments to your calls using standard ABC text typing on your Call Mynah keypad.

When you manage your calls using the XtR Desktop software provided, you will find the Important! And Comments features invaluable to finding specific call types quickly.
