

Call Mynah stores 340 hours (typically a whole years worth) of calls on the device. We appreciate that you may want a more convenient way of managing your recordings and so Call Mynah has a mini USB connector to allow you to transfer your calls onto your PC (you can also charge the Call Mynah from USB too).

To protect the security of your calls, to enable USB Call Transfer, you will need to enter your chosen password. This is to stop access to your calls if someone steals your Call Mynah.

Once you enter your password and plug Call Mynah into your PC, it will appear as external Drive and you can:

- Transfer and manage your recordings on your PC
- Install the XtR Desktop Software Supplied (on the Call Mynah device)
- Upgrade Call Mynah software with new features
- Download and install add-ons such as Wallpapers, Recording Announcements etc.

We include a full installation of our Xtension Recorder Desktop software with every Call Mynah. This software provides comprehensive search, playback and management features.

XtR Desktop Player - [Click to Enlarge](#)

XtR Desktop - Playback Features:

- Level indicator gives call activity
- Drag n' drop cursor rapidly locates key points in conversation
- Pause & Continue manual controls
- Search & list calls by:
 - o User Name
 - o Time & date
 - o Duration
 - o Caller ID or dialed digits
 - o Comments/notes made
 - o Importance
- Add comments to calls
- Set bookmarks (show important parts of a call)
- Email recordings to colleagues (as .wav file or compressed file)
- One touch Convert to .wav file

XtR Desktop also includes a Room Recorder

- Records Conversations from any PC Microphone
- Record important Interviews and Meetings
- Use for Dictation
- Record and E-Mail messages to clients
- Stores in same compressed format as phone recordings.

If your company uses multiple Call Mynah devices, you may wish to consider Intelligent Recordings 'Call Manager' or 'Call Reporter Pro' management packages for multiple phones (desktop or mobile).
