Introduction

Congratulations on your purchase of Call Mynah, the only
Universal Call Recorder for ALL Mobile Phones!

Call Mynah is part of an exciting range of cost-effective
Digital Call Recorders from Intelligent Recording.

This quick reference guide will take you through the
installation and setup of the Call Mynah and help you begin
recording your calls quickly.

Important Note: There are various support manuals &
programs in the memory of the Call Mynah. To view and
install these, please see the 'Connecting To Your PC'
section of this Quick Start Guide or you can download the
latest versions from the Call Mynah web site
www.CallMynah.com where you can register your Call
Mynah and receive 'Live Chat' technical support to help
get you started.

Contents

Your Call Mynah package should contain:

- Call Mynah Device
- USB style power adapter
- Mini USB Lead (to charge Call Mynah and to
connect to a PC)
- Headset with answer switch
- Quick Start Guide (this document)

If you do not have all the above items, please consult your
local reseller or Intelligent Recording on the contact
information provided on the front page.

Before You Start!

You must fully charge your Call Mynah. You can do this by
connecting the mini USB lead into Call Mynah and the
power adapter or by connecting Call Mynah to the USB port
on any PC.

Call Mynah will take approximately 5 hours to fully charge.

Call Mynah Layout

To turn Call Mynah on/off simply press and hold the 'End' key
for a few seconds.

Note – If Call Mynah is on, the LCD may go blank to save
power, simply press the Record key to restore the display.

Getting Started

To start using Call Mynah, you must first:

- Set Call Mynah Time & Date.
- Set Security & other parameters.
- Link Call Mynah to your phone using Bluetooth.
- Connect Call Mynah to your PC to install the software supplied and to view the manuals.

Set The Time & Date:

1. Press 'Menu' on the navigation keys to show the main menu.
2. Select '3 Settings'.
3. Select '5 Date & Time'.
4. Select '1' to set the Date (use Up/Down menu navigation keys and 'Next' to set).
5. Press 'OK' when Date is set and follow the same procedure to set the Time.
6. Press 'Back' key to display main screen and to confirm Date & Time is correct.

Set Security & Other Parameters:

Call Mynah has the following important security features:

- KeyPad lock to stop unauthorized access (after idle timeout).
- Password protected USB access to stop unauthorized access to your recordings from a PC.

To set the security you desire:

1. Press 'Menu' on the navigation keys to show the main menu.
2. Select '3 Settings'.
3. Select '6 Security'.
4. Enter the password (default '0000').
5. Select to have Key Lock on/off (and set timer)
6. Select to have USB Lock on/off.
7. Select to change the Key Code from the default (we recommend you always do this). Note, the Key Code can be up to 8 digits long.

You are now ready to connect Call Mynah to your mobile.

Connecting To Your Mobile

Call Mynah uses Bluetooth to connect to and record your mobile phone calls.

You will need to use the functions of your mobile phone as well.

To allow your mobile to phone to search and find Call Mynah:

1. Press 'Menu' on the navigation keys to show the main menu.
2. Select '4 Bluetooth'.
3. Make sure item 3 'Discover' is on (you may wish to change the default Bluetooth PIN too – default is '0000').

With Bluetooth Discover on and the PIN set, you can now set your Mobile phone to discover and connect to Call Mynah. You will need to consult your Mobile user guide on how to discover and connect to Bluetooth devices.

Once your mobile has found the Call Mynah, you will need to enter your chosen password to connect. Once you are connected, the Bluetooth logo on the Call Mynah LCD will be dark.

Making & Recording Calls

Call Mynah is initially set to record all incoming and outgoing calls, see the full user guide for all recording options.

Important - Calls will only be recorded when you use Call Mynah to answer or make outgoing calls. If you make calls using just your mobile, they **will not be recorded**.

Use Call Mynah to dial out via your Mobile (keypad plus Call Key) or answer incoming calls to your Mobile (just press Call/Answer key).

Calls can be made via the Call Mynah microphone and earpiece or via the headset supplied (with answer button) or using Call Mynah's in-built speakerphone (available on the menu keys when you are on a call).

Listening To Recordings

Call Mynah will save the date, time, duration, caller id and other parameters with each call.

To list and play calls simply press 'Log' on the navigation keys from the main screen, list all calls and scroll to the call you wish to play (to play, press '1').

Call Mynah can search and play calls using many different search methods using the 'List' function.

Connecting To Your PC Via USB

Connecting Call Mynah to your PC via USB will allow you to:

- Read the more comprehensive user guides supplied.
- Install the XtR Desktop software supplied (to manage your calls on your PC).
- Install the XtRCallMynah configuration software.
- Access the Call Mynah memory (for example to upgrade the Call Mynah firmware or to change recorded announcements etc.).

To connect Call Mynah to your PC, simply connect the mini USB cable between your PC and Call Mynah and select 'USB Mode' from the main menu (you may need to enter a password). You can now explore the Call Mynah memory.

Helpful Tips

- Visit www.CallMynah.com for Live Help
- Learn about all of the comprehensive Call Mynah features from the full user guides available on the device (or from www.CallMynah.com).
- Install XtR Desktop software for advanced management of your recordings using your PC.
- Use the 'Contacts' feature to store frequently dialled numbers.
- Use the menu's to set up if you wish to automatically record all calls or manually record.
- Use the Record Warn feature to tell callers they are being recorded if necessary.
