

Call Mynah has many of the features you would find in any professional business call recording system.

You can quickly and easily choose which recording features you want to use using the menu system.

Choose which calls to record:

Record All Calls - This option will automatically record every call you make. Of course you can delete a call after you've made it if you don't want it saved.

Manual Record - Simply press the 'Record' key at any time during a conversation and Call Mynah is smart enough to save the WHOLE call.

End Of Call Option - At the end of each call, Call Mynah can give you an option to save a call or delete it. You will be given a 10 second (programmable) countdown to make your decision.

Call Recording Announcement:

No Announcement - Will not tell your callers that you are recording the call.

Beep Tone - Call Mynah will send a short beep every 15 seconds to warn the caller that recording is in progress.

Announcement - This is a fully customizable announcement that is played when you first answer a call. We provide a number of options to choose from, or you can record your own announcement. A typical example is 'Please be aware that I am recording this call'

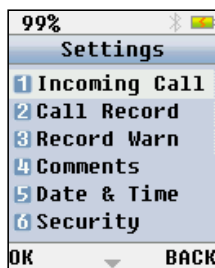

Decide What Type Of Calls To Record:

There are various options available to ensure you only record the calls you want, or never miss the most important ones.

Phonebook Record Options - You can choose to ALWAYS RECORD calls from a particular number in the Call Mynah phonebook or you can choose to NEVER RECORD calls from a particular entry. This feature ensures important customers are always recorded and calls from home (for example) are never recorded.

Ignore Calls Less Than A Pre-Set Time - This feature will not record calls that don't exceed a certain duration (0-30 seconds). This stops you recording calls when you dial and get 'Busy'.

Recording Management

Auto Delete Old Recordings - Call Mynah can auto delete old recordings when you reach 90% (user selectable) of memory capacity. Call Mynah will only delete calls that are not Important (see 'Adding Information To Calls'). With 340 hours storage on Call Mynah, you can be sure of saving at least 6 months of recordings before the auto deletion starts.

Set Maximum Record Time - You can set Call Mynah to stop recording a call over a certain duration (10mins to unlimited).

Set Maximum Number Of Calls Saved - To ensure the Call Mynah memory is manageable, you can set the maximum number of calls that can be stored (default is 3,000 calls).
