Algo 1202 Call Button

Illuminated Push Button for Customer Assistance & Emergency Notification

The 1202 Call Button offers a reliable and integrated solution for applications requiring one-touch programmable page announcement or alert notification.

The 1202 is highly visible and easily activated from its **large illuminated button**. The button is designed as a simple and intuitive interface for improving customer service or for emergency and non-emergency alerting. The 1202 is not rated for outdoor use. The dimensions of the Call Button are 4.5" x 6" x 1.5" / 11,5 x 15,2 x 3,8 cm

The 1202 requires one of the following Algo products as a SIP interface for operation (connecting via 24 gauge **single twisted pair**): 8061 IP Relay Controller (supports up to four buttons), 8189 SIP Surface Mount Speaker, 8188 SIP Ceiling Speaker, 8186 SIP Horn Speaker, 8180 SIP Audio Alerter (G2), or 8301 Paging Adapter.

When using the 8180 (G2)/8186/8188/8189/8301, the Call Button can be configured as follows:
-- initiate a multicast alert or announcement,
-- make a SIP call to a configured extension to play a discrete notification, or
-- make a SIP call to a configured extension and permit hands free communication (e.g. via the Algo speaker microphone).

When using the 8061, the only configuration option available is to make a call to a configured extension and playing a WAV file. If multiple buttons are connected to a single 8061 the WAV file can be unique to each Call Button.

Typical Applications

- Retail customer service assistance button
- Assisted living & long-term care help button
- Classroom or office intercom via an Algo speaker
- Emergency notification in schools & campuses
- Safety or mechanical notification alert in manufacturing or plant environments
- Help/Assistance at airports & public buildings
- Workplace medical emergency or security alert

Benefits

- High visibility easy to use **illuminated button** with **flash confirmation** when activated
- User customizable label
- Powered via Algo SIP endpoints including 8061, 8180 (G2), 8186, 8188, 8189 and 8301 for simple installation and web configuration
- Single twisted pair extended distance wiring for location almost anywhere
- Fully integrates Algo audible and visual accessories for notification and alerting over any size workplace, campus or enterprise
