iP WIFI VIDEO DOOR STATION FOR SMARTPHONE*

No matter where you are, with the free smartphone app VISTASMART2 you can **see, hear and speak** to your visitors from anywhere and even open the door.

- High-quality aluminium housing with protective coating, weather protection cover and LED downlight for e.g. step lighting
- 080p HD colour camera with wide-angle detection: approx. 160° horizontal and 90° vertical
- Connection to the router is either via WLAN or via the enclosed LAN cable
- As soon as a visitor rings, a sound and push message is sent to your smartphone
- In addition, a short video can be saved (microSD card required)
- Photo and video recording also possible during the call
- Door opening via slider against unintentional operation (if door opener is available)
- RFID integrated for door opening with enclosed RFID keys
- Camera activation also possible via integrated motion detector
- Built-in 433MHz radio transmitter for wireless extension of separately available radio doorbells of the BELL and FG series
- Connection for 2 separate door openers (potential-free relay contact)
- Automatic lighting for bell push button/name plate and LED downlight - switches **ON** in darkness and **OFF** in brightness
- Power supply optionally via enclosed plug-in power supply unit, bell transformer 8-12 VAC or top-hat rail power supply unit DT-2000

Accessories for expansion

- microSD Card for recording videos, max. 128 GB
- Radio doorbell BELL or FG series
