

# PLX-500: Product Information

## PLX-500

The Plantronics PLX500 is an "all in one" headset and amplifier combination. It interfaces to most standard telephones via the handset port. It has a headset/handset selector button, a mute button, and tone and volume controls.

## Product Features

- Headset button allows you to switch calls to your headset or hand receiver.
- Mute Button turns microphone on or off so you can have a private conversation "off-line" while the caller remains "on-line."
- Volume Control adjusts the listening and speaking levels of the headset for optimal sound quality.
- Single-earpiece design
- Lightweight flexible headband
- Soft foam ear cushions
- Noise-canceling microphone
- QuickAdjust microphone boom

## General

- Category: Headset/Amplifier Combo
- Date Code: Located on bottom of the base
- Works with SP-06 or SP-66 headsets
- Cannot be used with H or M series headsets
- There is no "Quick Disconnect" option
- Cannot be used with a "Y" training adaptor
