

USER MANUAL

IP Robust Telephone YTCS10-IP

Connection

Connect the telephone to your system.

Operation

- Receiving calls: Lift the handset when ringing
- Making calls: Lift the handset to dial out
- Ending calls: Handset On-hook

Installation

Web Settings

1. Web interface

You can use any standard web server (such as Microsoft Internet Explorer) to access the web interface of the IP phone. The IP address used to access the web interface is the IP phone address, received from a DHCP server or manually configured (static IP address) Enter the phone's web interface:

1. Connect the phone's WAN port to the IP network (use your local Internet service provider's network cable or ADSL modem).

Determine the IP address obtained from the DHCP server, you can see the IP address on the LCD display. Or after the phone connects to the network (it takes 40 ~ 60 seconds to successfully connect to the network), you can hear the voice of the IP address broadcast. Press **999# to re-play the announced IP address.

2. Open the web interface and enter the IP address of the phone (such as https://192.168.0.16) in the UPL address field, as shown below:

The web login window appears:

Web login window

A screenshot of a web login window. At the top, it says 'Sign in' followed by the URL 'http://192.168.0.16' and a warning 'Your connection to this site is not private'. Below this are two input fields: 'Username' and 'Password'. At the bottom right, there are two buttons: 'Sign in' (blue) and 'Cancel' (white with blue border).

3. Enter the User name and Password, and then click OK.

Note: The administrator's default login user name and password are "admin" and "admin" respectively.

4. When there is no DHCP server, the phone cannot obtain a dynamic IP address. This phone has a second IP address. This IP address is static. You can connect to the phone through 192.168.188.200.

2.Quick Setup

Hotline number setting:

Access the "VoIP Over IP" page (Configuration > Voice Over IP / Dialing)

The screenshot shows the 'VoIP Over IP / Dialing' configuration page. The left sidebar has a 'Dialing' menu item highlighted with a red box. The main content area shows several configuration sections. The 'Automatic Dialing' section is highlighted with a red box and contains the following fields:

- Activate: Enable (dropdown menu)
- Time Out: 15 (text input) Seconds
- Destination Phone Number: 0 (text input)

Other sections visible include 'Cycle Dialing' (Keep Time: 0), 'Dialing Alert' (Keep Time: 60), 'Default Audio Device' (Audio Device: Speaker), and 'Automatic Redial On Busy' (Activate: Disable). A 'Submit' button is located at the bottom right.

To quickly setup your phone:

Access the "Quick Setup" page (Configuration tab > Quick Setup menu > Quick Setup)

Submit

If shown in the figure above:

1. First select the use SIP proxy in the SIP proxy registration server bar to open, and then fill in the IP address of the IP server at the proxy server address. Other parameters remain unchanged as shown in the figure.
2. Fill in the line identification username, password, and other information in the line Settings bar, and then click submit to complete the registration.
3. After successful submission, you can view the registration results in the VOIP status bar, as shown in the following figure:

Go to "VOIP status" page (status TAB → system status menu → VOIP status)

Phone Status

Hook State	On Hook
Audio Device	Ringer

Line Status

Line Number	Line 1
SIP Registration - Registrar 1	Registered
SIP Registration Server	192.168.0.180
DnD	Off
Mute	Off
Forward State	Disabled
Forward Destination	N/A

3. Configure the static IP address

The phone's LAN configuration includes defining a method for obtaining an IP address. The IP address of the phone can be static. By manually entering the IP address, it can also automatically obtain an IP address from a DHCP server.

The method of setting the static IP address is as follows:

Go to the Quick Configuration page (Configuration tab → Quick Configuration menu → Quick Configuration)

Quick Configuration Page Field

LAN Setup

IP_Type:	<input checked="" type="radio"/> Static IP <input type="radio"/> Automatic IP (DHCP)
IP Address:	<input type="text" value="192.168.0.178"/>
Subnet Mask:	<input type="text" value="255.255.255.0"/>
Default Gateway_Address:	<input type="text" value="192.168.0.1"/>
Primary DNS:	<input type="text" value="0.0.0.0"/>
Secondary DNS:	<input type="text" value="0.0.0.0"/>

Select Static IP on the right of IP mode, then enter the static IP address to be set in the IP address box, fill in 255.255.255.0 in the subnet mask box, fill in the default gateway address in the Default gateway box, and click Submit.

Note: Please record the modified static IP address to avoid being unable to log in to the WEB configuration page after forgetting.

4. Modify the user login credentials

Go to the "User Management" page (Management tab → Phone Management menu → User Management)

System Authorization Page Field

Location: Management / Administration / Users

Administrator account

Username:	<input type="text" value="admin"/>
Password:	<input type="password"/>
Confirm Password:	<input type="password"/>

In the username field, enter the username.

In the password field, enter a new password, and then re-enter the new password in the confirm password field.

Click submit, A confirmation box appears.

Click OK.

5.Restart the phone

Go to "restart" page (management TAB → phone management menu → restart system)

Restart the system Page Field

Restart System

Click the restart button, a confirmation box will appear, prompting you to confirm, then click confirm.

6. Language switching

Switch between English and Chinese

Go to the "Reset System" page (Administration tab → Phone management menu → Restart system).

Web Language:

English

Change

7. Restore factory settings

Restore the factory default settings of the phone:

Go to the "Reset System" page (Administration tab → Phone Management Menu → Reset System).

Restore Defaults Page Field

Restore_to_Factory_Defaults

Submit

Click the submit button; a confirmation box will appear, prompting you to confirm, then click confirm.
