# Akuvox

## Basic Setup

**Mounting:** Slide the short edges of the L-shaped stand (the prongs) into the phone's two rear slots (see below). Slide the prongs in until they are locked.

Connect the handset and optional headset as shown below:

## Connect Network Cable and Power

You can either connect the IP-Phone to the power adapter directly or a PoE (Power over Ethernet) compliant switch or hub. The IP-phone can also share the network connection with other network devices by using PC port. Connection is shown below:

Note:
If Power over Ethernet is beging used, don't plug in the AC adapter.

## Configuration

**1.** After setting up the network and power, connect IP phone to your computer, then press ▤ menu softkey then select Status then check the IP address in the main menu. *( If you are using DHCP to obtain IP address )*

**2.** Launch web browser and type in the IP address to access web interface. Login with username and passwords(admin by default).

**3.** Register the device using your SIP account.*( Please refer to user manual for more information)*
